SOIL CONSERVATION & WATERSHED MANAGEMENT

Volume III

Conservation Forestry & Watershed Management

S.K. Dhyani
V.N. Sharda
G.P. Juyal

CENTRAL SOIL & WATER CONSERVATION RESEARCH & TRAINING INSTITUTE
218, KAULAGARH ROAD, DEHRADUN - 248 195, INDIA

2007

Chapter	Title	Page No.
Section 1 : Conservation Forestry		
	Forward	
	Preface	
1	Forests for Conservation of Natural Resources	1
1.1	Introduction	1
1.2	What is a forest ?	2
1.3	What is forestry ?	3
1.4	Conservation forestry, its need and scope	4
1.5	Forest types of India	5
1.6	Agro-ecological zones of India	6
1.7	National forest policy	8
1.8	Biodiversity	12
1.9	National wasteland development	14
1.10	Joint forest management (JFM)	15
1.11	India's efforts for sustainable development of forest resources	16
2	Locality Factors and Plant Succession	19
2.1	Introduction	19
2.2	Locality factors	19
2.3	Plant succession	27
3	Forest Management and Silvicultural Systems	34
3.1	Introduction	34
3.2	Objectives of forest management	34
3.3	Principles of forest management	35
3.4	Working plan	39
3.5	Management practices and conservation forestry	43
3.6	Silvicultural systems	44
3.7	Genetic improvement of trees	53
4	Forest Regeneration - Principles and Practices	55
4.1	Introduction	55
4.2	Natural regeneration	55
4.3	Artificial regeneration	59
5	Afforestation Techniques for Degraded Lands	87
5.1	Introduction	87

Chapter	Title	Page No.
5.2	Extent of degraded lands	87
5.3	Afforestation of denuded hill slopes	87
5.4	Afforestation of landslide areas	89
5.5	Torrent control measures	93
5.6	Mine spoils	95
5.7	Afforestation of ravine lands	97
5.8	Wind erosion control	99
5.9	Sand-dune stabilization	102
5.10	Shifting cultivation	104
6	Agroforestry Systems : Objectives, Scope and Establishment	109
6.1	Introduction	109
6.2	Farm forestry	111
6.3	Agroforestry concepts and definitions	112
7	Grassland Management : Production and Conservation	133
7.1	Introduction	133
7.2	Ecological status of the grasslands	134
7.3	Grassland management	134
7.4	Improvement of grasslands	138
7.5	Grazing management	139
7.6	Pasture management	142
8	Horticulture Development for Watershed Management	146
8.1	Introduction	146
8.2	Concept and advantages of conservation horticulture	148
	Model Questions	156
Section 2 : Watershed Management		
9	Watershed - A Tool for Development	158
9.1	Introduction	158
9.2	Watershed approach/concept	159
9.3	Guidelines for watershed development:	160
9.4	Watershed programme in India	164
10	Basic Resource Surveys	173
10.1	Need for basic resource surveys	173
10.2	Information / data needed	173
10.3	PRA techniques	178
10.4	Modern tools for watershed surveys	187

Chapter	Title	Page No.
10.5	Multi-data approach	188
10.6	Map reading	188
10.7	Interpretation of contour maps	190
10.8	Uses of contour map	190
10.9	Preparation of watershed base map	192
10.10	Characterisation of a watershed	193
10.11	Uses of slope map	194
11	Bio-Physical Interventions in Watersheds	195
11.1	Introduction	195
11.2	Biological / vegetative measures	195
11.3	Engineering measures	201
12	Development of Watershed Management Plan	211
12.1	Introduction	211
12.2	Watershed management planning	211
12.3	Capacity building	214
12.4	Monitoring and evaluation	214
12.5	Sustenance and follow up	215
12.6	Integration of social resource management with natural resource management	215
12.7	Project report on watershed management plan	215
13	Sample Watershed Management Plan	233
13.1	Executive summary	233
13.2	Introduction	235
13.3	General description of the watershed	235
13.4	Present land use	246
13.5	Soils and land capability classification	252
13.6	Problems and needs of the area	256
13.7	Proposed land use	256
13.8	Estimation and costing of the project	271
13.9	Socio-economic analysis of the project	278
13.10	Phasing of works	281
13.11	Recommendations	281
14	Impact Assessment	284
14.1	Introduction	284
14.2	Various aspects of watershed development	284
14.3	Success stories of some watershed projects	293
	Select Bibliography	307
